Navigating the Insurance Market

Come join us for an exclusive morning of networking and fellowship at the **Oyster Shed**.

This event is specially curated for members of the Worshipful Company of Constructors.

This month, we will be welcoming Freeman Amy Green who is a Development Executive at SR Insurance Solutions

Ever wondered how corporate insurance is designed, negotiated, and placed — especially for complex construction risks?

Join us for breakfast with Amy, an industry expert with over 25 years of experience, including major projects like the Port of Ardersier, the UK's largest new freeport.

Amy will lift the lid on how the insurance market really works. Learn how to navigate challenges like professional indemnity, insurer concerns over panels and materials, key legal cases shaping the market, and the importance of culture and mental health in risk management.

Expect real-life stories of crazy claims, avoidable mistakes, and the growing cyber threat to the construction industry.

This is an unmissable opportunity to gain insider insights, sharpen your risk knowledge, and connect with fellow members.
